

Case Study

## London Hospital

Unit reference

Theatre AHU

Scope of works:

EC fan upgrade, HTM level refurbishment

**The existing belt drive fan was coming to the end of its life cycle, and the trust required a small increase in fan performance.**

A replacement EC fan was installed c/w commando plug and sockets, with new door layouts, stainless steel internal bulkheads, doors c/w double action hinges to meet HTM requirements and flooring for the fan section, all completed in one working day, including commissioning of the new EC fan.

A spare EC fan was pre-wired with a commando plug and left with the customer for spares.
